At Huntsman Boats we made the change to maXtek hydraulic steering in 2017 and to date we have had only positive feedback from our dealers and customers New Zealand wide. We have installed on all our boats since that time and the maXtek system has proven to be 100% reliable.

Experience the precision of maXtek hydraulic steering

Boats fitted with high-horsepower engines require steering systems with enough muscle to provide fingertip control at the helm. **maXtek** marine steering systems are the perfect match for boats used for both pleasure and commercial applications.

maXtek marine hydraulic steering use only the highest quality materials and engineering from the helm pumps and cylinders to hoses and couplings. Simply put, lower maintenance, longer working life and superior reliability in the most extreme conditions.
